QUICK PHONE – HOSTED VoIP

Quick Phone is the future of business phone systems. It gives you all of the features of a premise based phone system without all of the upfront costs and while not becoming out dated as quickly. On top of this Quick Phone offers crystal clear HD call quality and will prepare your organization for the upcoming shutdown of the P.O.T.S. network.

FLEXIBLE SOLUTIONS FOR YOUR ORGANIZATION

Quick Phone is perfect for any size organization because it offers features that help no matter what size you are. For smaller organizations the fact that it is easily scalable and has a very low upfront cost is a huge advantage. However there are also great features for larger organizations such as having 500 long distance minutes per seat and have very easy multi-site applications that can all be managed from one easy to use online portal.

We invite you to [contact us](#) so we can show you how to bring your business into the future. With the latest in [Hosted VoIP](#) technology and a team of [dedicated](#) telecom advisors to [guide you](#) from start to finish.
